706G

656

706G

705

706G

The best-selling Carioca range now features five fantastic models.

All are built on the Fiat Ducato X2/50 with an impressive power output of 130 bhp as standard. The specification of the cab is significantly increased to include ABS brakes, driver's airbag, cruise control and electric windows and mirrors. The Carioca Range is ideal for both couples and families. Features include: U.K. handled near-side entry door, full kitchen (some with full cooker), washroom with separate shower and bi-fold doors. With a choice of sleeping and travelling places from two to six people, this range continues to offer excellent value for money.

Joining the 625, 656 and 706G (previously 665G) in the range of overcab models is the 705 featuring a comfortable lounge, large kitchen and end bathroom. The low profile 694 has been lengthened and offers a permanent double bed and extensive kitchen, with a large fridge and a separate freezer. All interior soft furnishings are designed and manufactured in the U.K. This makes the Carioca the **only** Italian motorhome manufactured exclusively for this country.

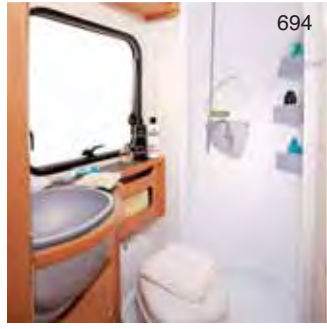

NEW FOR 2007

CARIOCA

Ci and Fiat
- a formidable
combination.

Extended warranty and Fiat Camper Assistance included.

We have extended the normal manufacturers warranty to include cover for major items for an extra period, giving you peace of mind for a total of 36 months. Full details are outlined in your Ci policy document.

In addition, the two year warranty from Fiat is complemented by a further package designed to ensure confidence when using Fiat chassis cabs. Fiat camper assistance has over 1,100 specialist centres in the U.K and throughout Europe, these centres are designed to accommodate motorhomes and offer help in the event of an accident, breakdown etc.

MIZAR

A stunning motorhome which is truly the envy of the competition.

Mizar range extended to three vehicles for 2007.

The impressive new Fiat Ducato X2/50 chassis cab is the base vehicle for the Mizar range. It's new high specification is complemented by the new optional powerful 160 bhp engine, this is in addition to the 130 bhp engine offered elsewhere in the Ci range.

The designer's brief for 2007 was to create a motorhome that would be the envy of the competition. This has been achieved through the design of a vehicle, where the

attractive sweeping lines of the exterior are mirrored internally by curved furniture in the lounge kitchen and washroom.

For this season, the GTL has the option of a permanent lounge with two sofas (one L-shaped) or a dining arrangement which converts into a double bed.

An additional layout joins the range and offers spacious storage at the rear under a comfortable transverse double bed, as well as a drop-down double bed above the cab.

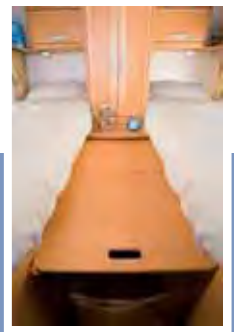

CIPRO

Renault the
automatic choice.

Elegant styling with a choice of four driving options.

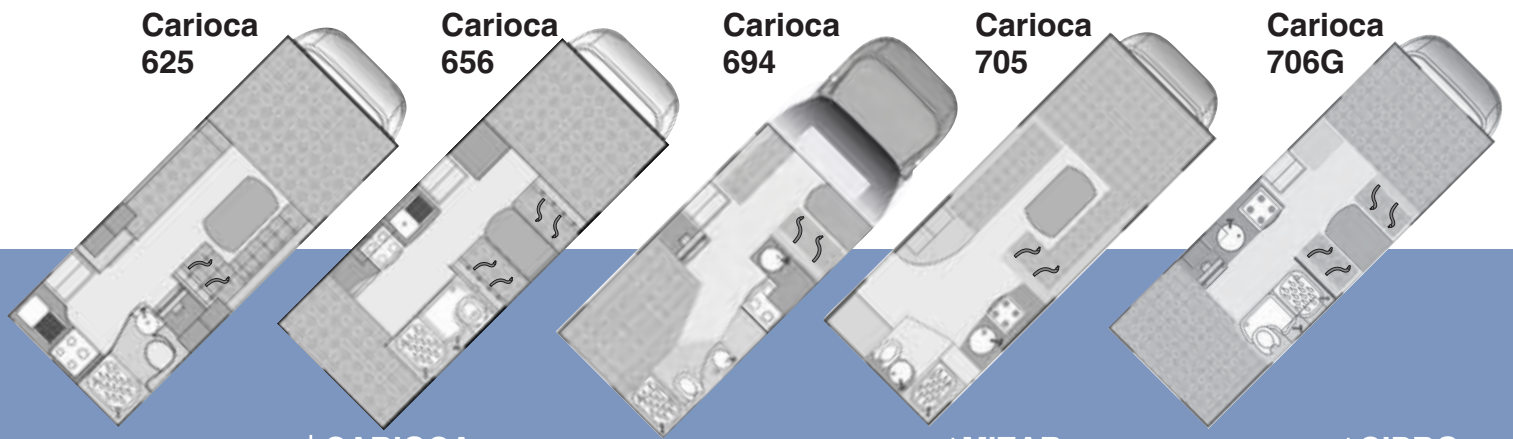

The 2007 low-profile Cipro 85 is built on the Renault Master chassis cab which now offers two power options on its 2.5 engine, as well as an optional automatic gearbox. Both the 120 and 150 bhp are now available from the DCi turbo diesel multi-jet engine, giving you, the customer, more choice. This high specification cab now includes driver and passenger air-bags, ABS brakes, electric windows and mirrors and remote control central locking. All soft furnishings are manufactured in the U.K. and when coupled with the flexible layout,

deliver tremendous character and style to people on the move. The two rear single beds with built-in ratchets offer various reclining heights and can also be converted into a transverse double bed if required. The lounge/dining area which includes swivelling cab-seats, can be turned into a single bed for that extra guest. Spacious external storage is featured under the rear beds for the carrying of those bulky items. The Cipro offers a separate washroom and shower, a spacious kitchen and full cooker.
