## 2007 Compass Touring Caravan Collection

Continuous improvement is the key to Explorer Group's 2007 ranges. Never allowing a range to stand still, but to incrementally progress and always offer the latest and best components available.

The 2007 Compass family of Corona, Omega and Rallye touring caravans, will for the first time adopt the same livery to unify the range and create a strong identity for the marque. The sunrise wave graphic design and striking coach lines first seen on the premium Rallye, have been refreshed and updated for 2007 with a deep blue to really stand out from the crowd.

The entire Compass range will also feature fabric options within each range to ensure that there truly is an interior to suit all tastes and lifestyles.

With all the improvements we have made and the new layouts we have introduced to the 2007 Compass range, why look at anything else.

The full specification and optional extras can be found towards the rear of this brochure.

Rallye 644 (Option B)

## Compass - What's New for 2007?

Omega 544 (Option A)

### Removable Front Chest of Drawers & Wraparound Seating Option

The front chest of drawers complete with slide out table extension in all parallel lounges is now removable. By simply loosening the two restraining straps the unit is easily removed to create a wraparound seating area with the addition of the optional upholstered base and backrest cushions.

### Fabric Options – All Models

All Corona, Omega and Rallye models now have two stunning interior upholsterys per range to give you the choice of interior design that best suits your taste and chosen layout.

### Balanced Alloy Wheels

The Explorer Group are the first UK manufacturer to introduce balanced alloy wheels to their touring caravans (standard on Rallye, optional extra in lieu of steel wheels on all other models).

Balanced wheels ensure greater tyre contact with the road, less vibration, greater stability and handling, leading to a more enjoyable towing experience.

### Jockey Wheel Nose Weight Indicator

For 2007 we've even introduced a clever nose weight indicator built into the top of the jockey wheel (standard on all Rallye models) to help you maintain the perfect nose weight and further reduce the risk of instability when towing.

### I-Pod / MP3 Connectivity

All Compass now have hard-wired jack sockets to plug your I-Pod or MP3 player directly into your caravan's entertainment system.

Discover all of the new improvements for 2007 in the specification table to the rear of this brochure.

Rallye 644

## Compass Corona 2007

Corona is an impressive value for money starter range that offers far more than many entry level touring caravans. With the range of optional extras available, Corona easily competes against supposedly higher specification and higher priced vehicles.

For 2007 Corona receives an external and internal fixture and fittings upgrade along with a choice of two new upholsterys.

2007 also sees the addition of the new 544 fixed bed single axle to the 9 model Corona range.

### Corona - Exterior Styling

New Compass family graphic design and vehicle decals, new design high level marker lights and an exterior access locker door with 230v output socket on all models brings more style and practicality to the Corona range.

The front gas locker has been modified to take the new BP Light gas bottle as well as traditional steel cylinders.

At the rear of the caravan is a highly reflective rear visibility panel to aid night time safety whilst towing.

556 (Option B)

544 (Option A)

## Corona - Interior Living Space

A choice of fully coordinating upholstery fabrics, pelmets, curtains and loose lay removable carpets gives you the opportunity to select the interior design that best suits you and your needs.

The solid wood decorative locker doors and internal veneered furniture is made from distinctive Aswald Ash, whilst all worktops are finished with decorative laminate.

An extension to the occasional table top on the front chest of drawers simply slides out from underneath and drops neatly into place. The whole unit can be removed to provide a full wraparound seating area (parallel lounge models only).

Drop down bed box doors to the front dinette seating are now standard specification.

New for 2007 is the addition of Aswald Ash veneer wall boards to all living areas with brushed steel effect wall board in the kitchen.

## The Kitchen

A Spinflo 3 burner hob with large high speed multi-function burner gives a greater range of options when using larger pans for cooking. Add to this the Prima Mark3 oven and the cooking of any meal is easily accommodated.

Food preparation is also given a helping hand with the a space saving single sink with bespoke silver washing up bowl and removable drainer, freeing up more work surface when you need it the most.

The Thetford N80e 81ltr refrigerator now comes with electronic ignition as standard.

### Corona – Model Specific Improvements for 2007

- Separate shower cubicle and improved toilet position in Corona 534.
- Vanity locker added to 540/505/636 washrooms.

## Compass Omega 2007

The 2007 Omega is the next step up from the Corona and is packed with a host of improvements that give this range a truly impressive specification.

In 2007 all Omegas have been made 7'6" (2286mm) wide giving you plenty of living space and superb value for money.

Omega also sees the addition of the new single axle 544 rear fixed bed layout complete with a spacious separate shower cubicle.

### Omega – Exterior Styling

New Compass family graphics and vehicle decals, along with Seitz privacy side and rear windows give the Omega a stunning look that would be the envy of your neighbours on any caravan site.

The Seitz windows not only look fantastic, they also offer a host of benefits including privacy from the neighbours, a cooler caravan interior and additional protection from the sunlight for upholstery and curtain fabrics.

The Omega also comes with heavy duty corner steadies and an exterior access door with 230v output socket as standard.

As with the Corona the front gas locker has been modified to take the new BP Light gas bottle as well as traditional steel cylinders. At the rear of the caravan is a highly reflective rear visibility panel to aid night time safety whilst towing.

524 L (Option A)

505 (Option B)

524 L

## Omega - Interior Living Space

Two very different upholsteries give you the option to choose the perfect interior to suit your chosen layout.

Solid wood decorative locker doors and Aswald Ash internal veneered furniture and wall boards give the Omega a high-price look without breaking the bank.

The front chest of drawers conceals the slide out occasional table and as with all Compass models is easily removed to form a u-shaped lounge (parallel lounge models only).

The 'So Comfortable' domestic quality pocket sprung mattress is new to Omega for 2007.

The main entrance door has a handy storage pocket and also benefits from a Horrex full door fly screen. This is un-tensioned with no spring back and slides easily from any point.

## The Kitchen

The Spinflo 3 burner hob with large high-speed multi-function burner accommodates larger saucepans and even woks. Add to this the Prima Mark3 oven and a 550w microwave oven and cooking on site is as easy as at home.

The Argent stainless steel linen effect sink comes complete with a chopping board and removable drainer that store neatly on top of the bespoke silver washing up bowl.

The space saving sink frees up more work surface making meal preparation even easier.

All worktops and occasional tabletops are finished with decorative laminate.

## Omega – Model Specific Improvements for 2007

- Separate shower cubicle and improved toilet position in Omega 484 & 534.
- External storage locker on 482, 524 & 524L models.
- 2nd Heki in 505 models + pleated blinds.
- Feature end panel in 540 washrooms.

## Compass Rallye 2007

The premium Rallye is the most well-equipped and luxurious of the Compass range and receives a striking new exterior makeover. Despite the top of the range status, and superb looks, the Compass Rallye continues to provide outstanding value for money.

We've even added a superb new 644 island double bed twin axle layout to the impressive 9 model line-up for 2007.

### Rallye – Exterior Styling

Blue coach lines with chrome edged decals, enhanced deep blue wave style graphics and the simply stunning Seitz privacy windows make the Rallye stand out from the crowd.

The stunning Seitz side and rear flush fitting privacy windows, exclusive to The Explorer Group in the UK, allow you to see out, but prevent your neighbours from seeing in. The tint helps to reflect rays from the sun that damage upholstery and can assist in keeping the interior cooler on the sunniest of days. Glare from the sun is also substantially reduced with minimal effect on the amount of actual light entering the vehicle.

All Rallye are built on the impressive BPW Swing V-Tech chassis with a Winterhoff WS3000 stabiliser and easy action handbrake, balanced alloy wheels and a clever nose weight indicator as standard.

Outside you will also find a highly reflective rear visibility panel, heavy-duty corner steadies, an awning warmer and an exterior gas barbecue point.

The new Ellbee one-piece exterior door features a slide-opening window with integral fly screen and storage compartment.

The exterior access locker door opens to reveal a handy 230v output socket, ideal for when you want to watch TV in your awning.

The front gas locker has been modified to take the new BP Light gas bottle as well as traditional steel cylinders.

644

## Rallye - Interior Living Space

The 2007 Compass Rallye is packed with a host of special features including Explorer's exclusive 'So Comfortable' domestic quality pocket sprung mattress to fixed bed models. As the name implies this mattress is 'So Comfortable', you are assured of the best night sleep you may ever have had in a caravan.

Rallye has been given a full make over with a choice of two striking new upholsteries and coordinating soft furnishings to choose from. Both offer superb styling and practicality.

The front chest of drawers in parallel lounge models is easily removed to form a wraparound seating arrangement using the optional infill seat base and backrest cushions.

Aswald Ash veneer furniture and wallboard give the interior appearance real warmth. Whilst all worktops and occasional table tops, are finished with decorative laminate.

Colour coordinated Horrex folding doors provide lightweight privacy.

The Sony CD/Radio now features I-Pod/MP3 connectivity via a hard wired jack plug socket.

## The Kitchen

The Spinflo 3 burner hob with high speed multifunction burner can accommodate large sauce pans up to 25cm, round and flat bottom woks up to 36cm and frying pans up to 24cm. Add to this the Prima Mark3 oven and 550w microwave oven supplied as standard and a simple cooked breakfast to a full evening meal are easily catered for.

The Argent stainless steel linen effect sink comes complete with a chopping board and removable drainer. All store neatly on top of the bespoke silver washing up bowl underneath the Chinchilla glass sink cover.

The space saving sink frees up more work surface making meal preparation even easier.

Domestic's elegantly styled RM7291L 93ltr power fridge with its curved Aswald Ash veneer door is standard in all single axle models. The 150ltr Domestic 7651L fridge freezer is provided with all fixed bed twin axle Rallye. All refrigerators feature Electronic ignition.

482 (Option A)

# Compass Security Systems

## Theft Deterrent, Prevention and Security of Your Touring Caravan

This is taken very seriously with Compass. That is why we have provided a combination of features designed to deter and prevent thieves from stealing your property. And in the unlikely event that they should succeed, aid the identification and speedy recovery of your investment and assist in the prosecution of the thief.

**Robstop WS3000 Hitchlock**

\*padlock not supplied

**Anti-Wind Corner Steadies**

## Robstop WS3000 Hitchlock

The Robstop WS3000 Hitchlock is made of high-grade steel alloy with a cylinder lock. It is very simple to operate and prevents unauthorised coupling and disconnection. It also prevents dismantling of the coupling itself. The safety ball covers the ball headroom of the WS3000 creating an additional means of protection – Available from your retailer.

## Anti-Wind Corner Steadies

The rear corner steadies on all Compass have a special cowling that allows for the precise positioning of a security bolt. Once the corner steadies are down, the bolt is put in place and padlocked\*. This prevents the potential thief from being able to lift the corner steadies making it extremely difficult to tow the vehicle away.

## Electronic Tagging

In conjunction with the CRIS registration scheme, all Compass touring caravans are electronically tagged during manufacture for added security and ease of vehicle identification.

## Microtag©

Supplied as standard with every Compass touring caravan, MicroTag© is an innovative and technologically advanced property tracing system that can be easily applied to all your valuables. Marking your property with Microdots not only deters theft, but will also help lead to the successful prosecution of the thief and the recovery of your stolen valuables.

Why Use Microdots? - In order for the Police to successfully prosecute, it is necessary to identify the true owner of stolen property. Marking your property with Microdots is the easiest way to ensure your valuables are quickly identified. You can Microdot all kinds of property against theft including your touring caravan, motor vehicles, televisions, bicycles, jewellery, in fact anything of value to you, that will also be of value to a thief.

In the event of theft or loss the police can locate the MicroDot by using an ultra violet light. The MicroDots are then read using a MicroDot reader, or a conventional microscope. Each MicroDot is laser etched with a free phone help line and your own unique number which is registered on the International Security Register, manned 24 hours a day, 365 days a year.

## CRiS - The Caravan Registration and Identification Scheme

CRiS is the national register of UK manufactured touring caravans and was established by the National Caravan Council (NCC) in conjunction with HPI Ltd.

All Compass caravans are recorded on the CRiS database by their unique 17 digit Vehicle Identity Number (VIN). This VIN and the caravan description are recorded on the Touring Caravan Registration Document, which is sent by CRiS to the caravan's registered keeper.

CRiS issues Touring Caravan Registration Documents that are the equivalent of the log books issued by the DVLA for cars – the Touring Caravan Registration Document confirms the name of the registered keeper, the VIN and full vehicle description.

## Window Etching & Chassis Marking

The VIN number is stamped onto the chassis of the touring caravan and etched onto all of the windows acting as a further deterrent.

## Explorer Protect - Autowatch Alarm system

The Explorer Protect system is fitted as standard on the Compass range.

Manufactured by Autowatch, The Explorer Protect system is designed to give years of trouble free operation. Made with only the highest quality components and using state of the art technology you can be assured that your caravan has the best electronic protection available.

Each caravan alarm is installed with a Passive Infrared Detector (PIR), a wireless sensor that detects movement in the caravan and transmits a radio signal to the alarm module. If the alarm is on the siren will sound. A leg sensor, fully sealed against dust and water, detects if the corner stabilising leg is being raised or lowered and transmits a coded radio signal to the alarm. Additional sensors can be purchased from your retailer to enhance security.

*Highspeed test track*

## BPW Swing V-Tec Chassis

The 2007 Compass range of touring caravans features the advanced Swing V-Tec axle-chassis system from BPW, quite simply because we believe it to be the best available. Our rigorous testing at UK and European proving ground & vehicle test track facilities has proven

It's superior reliability & stability over other chassis makes available.

BPW are the European market leader with over 10 million axles sold world wide, & an enviable reputation for producing high quality equipment. BPW axle & suspension systems are designed for high performance, reliability and low maintenance.

The main advantages of the Swing V-Tec are:

- Improved ride stability due to a dynamic self-steering effect (un-noticeable in normal towing conditions), reducing the risk of swaying, sideways movement and side wind sensitivity.
- Greater stability even with sudden steering manoeuvres giving a wider margin of safety in an emergency situation.
- Excellent cornering ability due to increased tyre contact with the road, minimising body roll.
- Safer at high speed.

## Product Development

### Continuous Improvement, Product Development & Testing

The construction methods & the running gear and axles used in our touring caravans need to satisfy exacting requirements. All new touring caravans need to be as safe as possible & have the best build quality, issues that are taken very seriously with Compass.

The large surface areas of the front & side walls of a caravan are fully exposed to head & side winds. These factors, combined with the weight of the vehicle & the higher centres of gravity present special challenges to our engineers.

Every new & ongoing development is accompanied by extensive studies & driving tests, many conducted jointly with or by our supply partners.

Stability and handling of a high performance car may rely on firm suspension, but not many cars have cupboards full of crockery! Driving tests conducted by Explorer &

BPW at the DAF Vehicle test centre in Eindhoven & the Dutch Safety Inspectorate in Lelystad, were used to establish the current touring caravan designs. During these tests every possible influence on the damping of caravan movement whilst being towed was painstakingly examined.

On the test track manoeuvres were undertaken in all driving conditions & on a variety of road surfaces. This included endurance tests on the notorious Belgium pavé road that proved the strength; build quality & reliability of our caravans over the equivalent of 13,500km. We have even undertaken a 24-hour high speed endurance trial around BMW's performance centre track, the purpose built Rockingham Raceway, as a means of testing both high speed stability & vehicle reliability in a way that far exceeds normal conditions experienced by our customers.

The information and data obtained in all of these tests is used to develop the caravan and running chassis to the highest standards, as in the case of our braking system that achieves deceleration values far in excess of statutory regulations.

## Winterhoff Stabiliser

The Winterhoff WS3000 is a convenient single lever system for easy coupling and stabilising. The special friction pads in the coupling are pressed against the tow ball of the towing vehicle under high spring pressure, thus suppressing dangerous snaking and pitching motions of the touring caravan before they build up.

The main advantages of the WS3000 Stabiliser are:

- Dampens snaking and pitching of the touring caravan.
- Allows more space between rear door mounted spare wheels, common on 4x4 tow vehicles and the open stabilizer.
- Easy to read wear indicator.
- Clip system for easy replacement of the friction pads.
- Ease of engagement and disengagement.

When combined with the Swing V-Tec chassis, the WS3000 offers the ultimate towing experience, but don't just take our word for it... The RWTÜV Essen, as an objective, independent organisation carried out detailed comparative tests of all towing ball couplings and stabilising gear on the market.\*

These tests included criteria such as safety during towing, construction type related limited values, handling and maintenance of each system with a variety of weights. The comparative investigations were carried out at the Institute for Vehicle Technology in Essen, Germany and on the test area at Trier-Föhren Airfield. The test winner was the Winterhoff WS3000.

## Balanced Alloy Wheels

The Explorer Group are the first UK manufacturer to introduce balanced alloy wheels to their touring caravans.

Wheel balancing refers to the proper distribution of weight around a revolving tyre and wheel assembly.

Unbalanced wheels are prone to vibration that can shake the caravan structure and its contents. An out-of-balance wheel literally bounces down the road rather than spinning smoothly. This can affect your speed and handling and may even reduce the mileage of your car.

Proper wheel balance ensures that the wheels, while spinning, do not have a heavy spot that can cause vibration and premature wear of tyres, struts, shocks and other suspension components. When combined with proper wheel alignment, balanced wheels ensure a smooth ride and a more enjoyable towing experience.

## Hand Brake, A-Frame and Jockey Wheel

The easy action handbrake could not be simpler to operate and the central position of the jockey wheel aids manoeuvrability. When retracted it is concealed neatly beneath the A-frame to provide a more aerodynamic look to the front of the caravan.

When not in use, the hitch cable plugs fit snugly into the bespoke recessed mouldings in the A-frame cover, and drain holes help to protect the pins from the elements.

For 2007 we've even introduced a clever nose weight indicator built into the top of the jockey wheel to help you maintain the perfect nose weight and further reduce the risk of instability when towing (supplied as standard on Rallye only).

## Thermal Insulation and Heating Classification

All Compass touring caravans are classified as Grade 2, in accordance with British Standard BSEN 1645 part 1, for thermal insulation and heating. This standard allows for the interior temperature to be maintained at 20°C when the exterior ambient temperature is 0°C.

## Compass Owners Club

As a Compass owner, you are eligible to join the Compass Owners Club. With a huge number of rallies and wide range of activities to take part in, membership adds a whole new dimension to the fun you can have and the friends you can make whilst enjoying your touring caravan.

For more information about the Compass Owners Club follow the link on the Explorer Group website, visit the owners' club site, or contact:

Mrs Anne Byers, Membership Secretary,  
The Compass Owners Club, 1 Greenacres, Stainton,  
Middlesbrough TS8 9BN.

## The Compass Promise

For over 27 years value for money has been central to the design and development of Compass touring caravans.

Through the building and rigorous testing of prototypes, to construction, fitting and finishing, the wide range of products we currently offer embraces every imaginable lifestyle.

All of The Explorer Group's touring caravans comply with relevant European standards and UK Road Vehicle Regulations.

## Peace of Mind

We recognise the value that peace of mind affords on the open road. So in addition to using the latest materials, components and manufacturing techniques, we offer a range of warranties: 5 Year Water Ingress Guarantee and 3 Year Comprehensive Factory Backed Warranty.

An exceptional package of warranty cover designed to give you long-term peace of mind, and enhance the resale value of your investment.
