

**ON THE ROAD
TO HAPPINESS**

CHAUSSON

HAPPY IN OUR CHAUSSON!

- 1 - Digital machining workshop producing bodywork panels.
- 2 - Before delivery of each motorhome, Chausson proceeds with all roadworthiness operations: verification of parallelism, empty weight and complete cleaning.
- 3 - Simulator recreating rolling or parking conditions in the rain allowing intensive waterproofing tests.
- 4 - A customer relations department is specially dedicated to welcoming and advising users and relations with Chausson distributors. You may be received by appointment.
- 5 - Chausson network of 130 distributors in Europe.

The road will always be a happy one in a Chausson motorhome. Since the first vehicle in the 80's, we have travelled far together and shared so many things! Miles have rolled past, opening up new horizons onto a vast range of innovative features, Chausson has become a recognised leader on the European market. The pleasure of travel can only be real when accessible to as many people as possible: clever features at affordable prices, absolute comfort especially in bedding and competent after-sales service everywhere in Europe, are the secrets of a successful journey... And for you, when you choose a major brand, you are guaranteed a reliable investment with an appreciable resell value.

So start the engine and head towards happiness!

LEAKTIGHTNESS GUARANTEED FOR 5 YEARS

The waterproof exterior of your Chausson motorhome is covered by a 5-year water ingress (with an annual maintenance check by one of the Chausson network's certified members).

INTERIOR GUARANTEED FOR 2 YEARS

In addition to the 5-year leaktightness guarantee, Chausson also guarantees the interior decor for 2 years.

 (1) Certain heavy accessories, such as large blinds or electric generators may be on offer to you on the market. The weight of these accessories will be deducted from the payload and may require a reduction in the actual number of passengers. Thus, the maximum permitted loads on the axles and the PTAC (maximum permitted weight) must be adhered to during full loading of the vehicle.

Weight empty in running order: the weight empty in running order includes the weight of the driver (75 kg) and 90% of the water, fuel and gas tanks. Tolerance +/- 5%. The indicated weights empty in running order only take account of series equipment (+/-5%). The manufacturer reserves the right to alter this equipment list at any time.

- Accessories fitted as an option are not included when determining the weight empty. Their weight should therefore be deducted from the available payload.

- You may be able to find certain heavy accessories like large blinds or generators in the marketplace. The weight of these accessories should be deducted from the payload and could possibly lead to a reduction in the actual passenger numbers. It is therefore important not to exceed the maximum loads on axles and the technically acceptable loaded weight when the vehicle is fully loaded.

- Some models photographed in this catalogue may be shown with equipment supplied as an option. The characteristics of photographed models may vary from one country to the next. Despite the care taken in producing this catalogue, this cannot be viewed as a contractual document. CHAUSSON reserves the right to modify its models without prior notice. CHAUSSON cannot be held liable for any modifications made by its suppliers nor typographical errors when printing these documents. It is forbidden to reproduce, even partially, text or document.
