* Please note that these options will be supplied after caravan manufacture and fitted at the supplying retailer premises

Effective from 1st September 2012

Caravan Payloads: For 2013 models, the method of calculating the Mass in Running Order (MRO) and user payload figures has changed in order to bring it in line with European Vehicle Directives. Allowances for essential equipment (e.g. gas cylinders) previously allowed for in the user payload are now contained within the MRO. A provision for a leisure battery which used to be within the essential equipment payload has now been included within the personal effects payload allowance. Although the method of calculation has changed, the overall effect is that the amount of payload available to the customer has remained the same, it is just calculated in a different manner.
