Key: o = Optional ● = Standard - = Not available

*Please note that these options will be supplied after caravan manufacture and fitted at the supplying retailer premises

Effective from 1st September 2013

Caravan Payloads: For 2014 models, the method of calculating the Mass in Running Order (MRO) and user payload figures has changed in order to bring it in line with European Vehicle Directives. Allowances for essential equipment (e.g. gas cylinders) previously allowed for in the user payload are now contained within the MRO. A provision for a leisure battery which used to be within the essential equipment payload has now been included within the personal effects payload allowance. Although the method of calculation has changed, the overall effect is that the amount of payload available to the customer has remained the same, it is just calculated in a different manner.

You won't see the innovation built into every Lunar caravan, but the improvements will make all the difference right at the heart of your holiday experience.

Our innovation through Core® integrates materials of a proven background with those of leading edge quality. Our progress through lightweight technology has introduced a pioneering thermoplastic material to the inner wall, creating an enhanced body shell that boasts superior properties;

Weight – reduced by up to 55 kg

Moisture resistant – reduced condensation

Strength – improved durability

Warmth – improved insulation and Grade III compliance

All prices are ex-works and include VAT @ 20% but exclude a recommended retailer delivery charge of £495 (including VAT)

*Please note that these options will be supplied after caravan manufacture and fitted at the supplying retailer premises
